Appendix B

Green Infrastructure Assets

Addition to Lanark County's 2022 Asset Management Plan

Background

O. Reg. 588/17: ASSET MANAGEMENT PLANNING FOR MUNICIPAL INFRASTRUCTURE states "green infrastructure asset" means an infrastructure asset consisting of natural or human-made elements that provide ecological and hydrological functions and processes and includes natural heritage features and systems, parklands, stormwater management systems, street trees, urban forests, natural channels, permeable surfaces and green roofs.

This Appendix provides a summary of green infrastructure assets owned by Lanark County.

Community Forests

Lanark County has a Community Forest Operating Plan. The 2023 to 2027 Operating Plan is available at the following Hyperlink:

https://www.lanarkcounty.ca/en/resources/Lanark-County-Forest-Operating-Plan.pdf

Highlights of the Forest Operating Plan are as follows:

- 1. The Lanark County Community Forest consists of 44 properties comprising 4,619 hectares (11,409 acres).
- An environmental management system (EMS) exists for the County Forests. The EMS is described in detail in the 2011-2030 Forest Management Plan, and is updated in each Operating Plan. The 2011-2030 Forest Management Plan is available at the following Hyperlink: <u>https://www.lanarkcounty.ca/en/doingbusiness/resources/documents/Forestry/Lanark-County-Community-Forest-Management-Plan-2011-2030.pdf</u>

- 3. The County Forest's are professionally managed by the Mississippi Valley Conservation Authority (MVC).
- 4. As a participant in the Eastern Ontario Model Forest (EOMF) Certification Program, Lanark County follows a management system which is compliant with the standards of the Forest Certification Council (FSC).
- 5. The Community Forest program on a net basis operates at no cost to the taxpayer (i.e. over the long-term Timber Sales have exceeded Management Expenses).
- 6. Section 2.3 of the Forest Operating Plan provides details of the latest Forest Health Inspections. Section 3.3 of the same plan provides an overall summary of Forest Health.

Trails

The trail network consists of 5 trails which total 92.7 kilometers in length (details are provided in Table 1 below).

All trails are rated in "Good" condition.

Planned capital expenditures by year are provided in Table 1 below. Projects include items such as:

- \cdot Access Gates
- · Culvert Replacement
- · Fencing
- · Parking Lots (expansion, resurfacing and creating new)
- Signage
- · Surface Replacement/Intersections

The County's 2025 budget included the planned capital expenditures provided in Table 1. Future budgets will include estimated expenditures for the time period of 2026 to 2032.

The County's Trail network includes 11 significant bridges with an estimated replacement cost of \$45 million. Many of the bridges have had extensive capital work completed in the last few years and are in good condition. This is the reason there are no forecasted bridge capital expenditures for the time period of 2025 to 2032. Details are provided in Table 2:
